Keep the original check for your records.

We input the information from your faxed check to create a duplicate pre-authorized bank draft with the same check number and same amount as the one you faxed. After it is deposited, you will receive it back from your bank along with your other cancelled checks. Pre-authorized checks have been universally accepted in the banking industry for years. Your faxed check serves two purposes: it assures that the information on the pre-authorized bank check is correct and it provides written authorization to create a check for deposit. Faxing a check is even safer than mailing it—plus it is much faster. If you have any questions or feel that we can be of further assistance, please let us know.
